01

New York City planners have estimated that another 1.6 million people will be living in the region by 2035, most of which will use public transportation to get around.

02

Changing work patterns mean that traditional commute times are vanishing.

03

New MTA projects, including the redesign of 33 subway stations, will mean more development opportunities for construction companies in formerly hard-to-reach neighborhoods.

04

As millennials eschew owning cars, overall MTA ridership, including off-peak ridership, is projected to rise.

05

A new open road tolling system by the MTA is projected to save commuters up to 21 hours of drive time each year.
